material: C1022 Low Carbon Steel, Core Hardness: HRC32-40

finish: Dagger-Guard Coating™ is a three layer, multi step dip/spin/bake process which provides 1000 hour salt spray corrosion resistance

application: Wood to metal or un-cracked concrete, hollow block CMU, or grouted hollow block CMU

installation: Drill the hole using a standard carbide drill bit with the proper diameter. Do not use a hammer drill. Concrete and grouted CMU - drill the hole 1/4" deeper than recommended embedment. Hollow CMU - drill the hole through the full thickness of the face shell. Drive until fully seated, do not overdrive the anchor.

Meet or exceeds the following specifications:

NOA No. 22-0302.02

ASTM A510	Specification for general requirements for carbon steel wire rods (Minimum grade 1018)
